Summary

Product Manager with 10+ years progressing from business analyst to product owner to PM, now building agentic AI and LLM-powered decision-intelligence platforms for enterprise leadership. Deep domain grounding in supply chain, demand planning, and forecasting, applied to modern AI architectures (multi-agent systems, RAG, knowledge graphs). Shipped platforms that freed \$22M in working capital in a single quarter and improved forecast accuracy up to 40% across 12+ global markets.

Employment

Product Manager, UPL LTD, Bangalore

July 2025 – Current

Led product strategy for a production-grade multi-agent AI platform (Agentic AI, Generative AI, Knowledge Graph architecture) that consolidates fragmented enterprise and market data into a single real-time decision layer for leadership, overseeing a 9-person pod across data science, engineering, and design. Adoption grew from 72 to 100 of 220 target leadership users within two quarters of launch.

Separately, partnered with a 12-person forecasting pod to replace manual, error-prone review workflows with an LLM-powered recommendation engine, improving forecast accuracy and cutting manual review effort.

- **Product Strategy and Planning:** Shaped end-to-end strategy for the Multi-Agent Executive Intelligence Platform, translating fragmented EXIM, FX, and market signals into a single real-time decision layer for senior leadership.
- **Product Development:** Directed a 12-person forecasting pod (8 data scientists, 2 data engineers, 2 visualization specialists) to replace manual, error-prone review workflows with an LLM-powered forecasting and recommendation engine, improving accuracy by 23% and cutting manual effort by 45%.
- **Metrics and Business Impact:** Unified previously siloed planning functions onto one analytics and decision-intelligence layer (a control-tower model), cutting planning exceptions by 30% and freeing \$22M in working capital in Q4.
- **Product Design and Research:** Acted as product designer for the platform, building Figma prototypes across every internal product and translating research into user stories and engineering-ready requirements.
- **Technical Architecture and Testing:** Partnered with engineering to architect the agent orchestration layer on LangChain and LangGraph, defining API contracts for real-time data integration and running structured A/B tests to validate agent response formats.

Senior Consultant - Product Management, Ernst and Young, Bangalore

June 2023 – June 2025

Directed cross-functional pods (~10 data scientists, 14 data engineers, 5 visualization specialists per product line) across multiple concurrent global engagements, owning product strategy, roadmap, and delivery of AI-driven planning solutions across 12+ global markets for enterprise clients.

- **Product Strategy and Roadmap:** Directed product strategy, roadmap, and end-to-end delivery of AI-driven planning solutions across 12+ global markets, lifting feature adoption 30% and forecast accuracy 40% while cutting forecast bias 15%.
- **Product Launch and GTM:** Orchestrated product launches end-to-end from concept through beta with pilot clients to full GTM rollout running Figma prototyping and structured A/B testing with an FMCG client to validate a single view of geography before scale rollout.
- **User Research and Discovery:** Ran structured user interviews and discovery sessions with client stakeholders to surface pain points and prioritize the roadmap, translating feedback into PRDs, user stories, and measurable success criteria.

Product Owner, Capgemini, Bangalore

July 2021 - June 2023

Owned design and delivery of forecasting and planning products for global enterprise clients, partnering directly with business stakeholders to prioritize a scalable product backlog.

- **Product Design and Delivery:** Managed design and delivery of forecasting and planning products, improving accuracy 15%, planning efficiency 20%, and cutting excess inventory 10%.
- **Analytics and Reporting:** Shipped decision-support dashboards giving stakeholders real-time visibility into product lifecycle performance, translating requirements into user stories and a scalable, prioritized backlog.
- **Adoption and Impact:** Drove 22% adoption of new planning dashboards among client planning teams, supporting an estimated 10% revenue protection through reduced stockouts.

Senior Business Analyst, Accenture Solution Pvt Ltd, Noida

June 2017 - July 2021

- **Planning and Inventory Optimization:** Spearheaded planning and inventory optimization across 3 distribution hubs and 120+ market locations, achieving 75% forecast accuracy, cutting stock-outs 30%, and reducing excess inventory 20%.

Business Analyst, Transport Corporation of India Ltd, Mumbai

August 2015 - June 2017

- **Operations Analysis:** Identified operational inefficiencies across logistics and 3PL networks, delivering analytics-driven improvements to service planning and stakeholder alignment.

Skills

AI & Product

- Agentic AI, Multi-Agent Systems, LangChain, LangGraph
- LLM Applications, RAG, Knowledge Graphs, Product Strategy
- Product Discovery, Roadmap, PRDs
- User Stories, A/B Testing, Agile/Scrum, Figma Prototyping, Wireframing

Data & Technology

- SQL, Databricks, Power BI, Data Modelling
- Statistical Forecasting, API Integration Architecture, Jira, Confluence

Domain Expertise

- Supply Chain Control Towers, Demand & Supply Planning, S&OP
- Inventory Optimization, EXIM & Supply Chain Intelligence

Education

Indian Institute of Management, Bangalore Executive Education Program, Digital Operation and Supply Chain	2022-2023
Gauhati University, Guwahati MBA, Marketing and Human Resources	2013-2015
Gauhati Commerce College, Guwahati B. Com (Hons), Management	2010-2013
